70 Years of Scientific Breakthroughs: Ames Laboratory

Members of the original team of scientists and students involved in the purification process reunited 40 years after the Ames Project began. The boulder on campus with the plaque marks the spot where 2 million pounds of uranium metal were produced for the Manhattan Project.
Exceptional Faculty
Leading research on brain disorders

Parkinson’s Disease

Anumantha Kanthasamy
Distinguished Professor and chair of the Department of Biomedical Sciences

Alzheimer’s Disease

Auriel Willette
Assistant Professor of Food Science and Human Nutrition
Construction Update: Bessey Hall addition

February 22, 2016

Monday (June 5, 2017)
Construction Update: Advanced Teaching and Research Facility

January 22, 2016

Monday (June 5, 2017)
Construction Update: Student Innovation Center

May 16, 2017

Tuesday (June 6, 2017)
Cyclone Space Mining
Team competes in NASA’s annual Robotic Mining Competition
PrISUm Solar Car Team
Next-generation Solar Utility Vehicle
The university’s Virtual Reality Applications Center (VRAC) focuses on the usefulness of VR technology in multiple walks of life. An on-campus VR machine called the C6 offers the highest-resolution enclosed virtual reality space on Earth.
